

*Pure dihydrate gypsum improves water infiltration...
Helps reduce runoff and erosion...Saves water.*

Product Features

- 95% Dihydrate
 - Dihydrate gypsum is more effective than anhydrite gypsum when water is applied
- Aids flocculation of soil and water penetration to slow or end ponding and runoff
- Breaks up compacted clay soils and improves soil structure
- Root systems will benefit from needed moisture and oxygen
- Adds calcium and sulfur for plant nutrition and improving crop yields
- Improves acid soils by reducing aluminum toxicity

Guaranteed Analysis

Calcium Sulfate Dihydrate ($\text{CaSO}_4 - 2 \text{H}_2\text{O}$)95%

- Calcium (Ca) - 22.0%
- Sulfur (S) – 17.5%
- Derived from mined gypsum
 - Gypsum is a naturally occurring mineral

Recommended Application Rates and Methods

- Penny Newman representatives know when and how much. Contact a representative now to make your investment successful!
- 1 to 2.5 tons per acre in the fall after harvest
