K-C 70 POTASSIUM  
ACETATE

0-0-26

*The most plant available potassium fertilizer on the market.*

### Product Features

- 26% potassium-carbon blend derived from potassium acetate
- Carbon has been shown to enhance the availability and uptake of potassium to the plant
- Has shown a 60% uptake in as little as 72 hours time
  - More commonly used potassium fertilizers are limited to a maximum uptake of 24% over an extended period of time
- Higher uptake efficiency allows you to use fewer gallons per acre, reducing product and application costs
- Low salt index
- Better long-term solution for promoting healthy soils
- Potassium triggers several different functions in the plant notably enzyme activation, protein, carbohydrate, and starch synthesis, water uptake and more

### Recommended Application Rates and Methods

- Recommended on all crops for healthier soils
- Can be applied through water-run, drip, or overhead irrigation
- May be mixed with most tank fertilizers prior to application
- Apply 1 to 8 gallons per acre annually in combination with Carbon Penetrant + PNGreen
  - Row Crops: 2 applications per season, 1 to 5 gallons depending on potassium needs in early and mid-summer
  - Tree Crops: 2-3 applications per season with 2-3 gallons in early spring, mid-summer, and/or post-harvest

*Kiss your  
potassium  
uptake  
problems  
goodbye!*
