

*Achieve rapid nutrient uptake with this versatile product.*

### Product Features

- NACHURS Triple Option is a versatile N-P-K-S liquid fertilizer that contains 100% orthophosphate, sulfur, and NACHURS Bio-K technology, the most plant available source of potassium
- NACHURS Bio-K is a premium source of potassium fertilizer combined with a natural plant metabolite creating the most effective and efficient source of potassium. Using Bio-K technology results in quicker germination, improved root development, and an elevated abiotic stress tolerance; this leads to better plant establishment, more vigorous growth, and higher yields.
- What makes Bio-K unique is in the origination of its organic-based carrier (anion), the acetate molecule. Acetate is a natural plant metabolite that has many important functions within the plant as well as in the symbiotic relationship between plant roots and soil microbes/mycorrhizal fungi.
- NACHURS Triple Option is a high orthophosphate fertilizer offering immediate nutrient availability.
- Low salt index

### Recommended Application Rates and Methods

- It can be safely applied at any time during the growing season without risk of burning
- Recommended on all crops for healthier soils
- Can be applied through water-run, drip, overhead irrigation or foliar
- May be mixed with most tank fertilizers prior to application
  - It is always recommended that a jar test be done when adding to other fertilizer or chemicals. Always read and follow the pesticide labels when considering tank mixing pesticides with fertilizer products.
- Apply 1 to 5 gallons per acre annually in combination with Carbon Penetrant + PNGreen
  - Row Crops: 1 to 5 gallons depending on needs in early and mid-summer
  - Tree Crops: 2-8 gallons per season

*Excellent  
preplant or  
transplant  
fertilizer!*
